## **DETAILED ACTION**

### ***Continued Prosecution Application***

1. The request filed on 06/20/2003 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/393949 is acceptable and a CPA has been established. An action on the CPA follows.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 3, 14-16, 27, and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Firoiu et al (U. S. Patent No. 6,009,077).

Firoiu et al discloses a plurality of queues (FIG. 2) for storing packet and a controller 345 (a link scheduler) for scheduling a packet for switching according to an Early Deadline First (EDF) scheduling policy, the scheduler assigns a deadline to each packet that equals the sum of the arrival time, the route delay, and longest permitted queuing delay for the packet, i.e., the EDF is equivalent as weighted versions of the computed delay and the largest weighted delay associated as recited in the claims.
